NationSat Building Survey

for: _____

Potential Equipment and Antenna Locations

Do you have a room where we can locate a NationSat DIRECTV System? Yes No

General Requirements for a NationSat System:

- Space: 30" wide x 20" deep x 72" high
- Room is clean and secure
- Room does not get hot, void of temperature extremes, and should have good air circulation and air conditioning
- Tested, isolated, 20-30 amp power outlet

Is it possible to run coaxial cable from this room to the central location of where your distribution "starts?" Yes No

How far is this distance? _____

Do you have an unobstructed view looking to the southern sky? Yes No

Do you have a location where you think a satellite antenna(s) could be located? Yes No

Would you like the satellite antenna to be physically mounted to a side wall on or near the roof (Yes)
-or- on a flat non-penetrating roof mount? (Yes)

Is it possible to run coaxial cable from this satellite antenna location to the satellite head-end equipment room location? Yes No

How far is this antenna location from the satellite head-end equipment room location? _____

Do you have a Loading Dock at your Property? (Yes) Or should we be sure to deliver the NationSat system to you with a Truck that has a drop-gate? (Yes)

Please include any addition notes or information you think may be helpful: _____
